Introduction

Heartopia is a cozy multiplayer life-simulation game developed by XD Games. It is about creating your own life in a beautiful town, building a home, meeting residents, developing hobbies, making friends, and discovering stories hidden around the world.

How to play

- Discovering the town and its history.
- Meeting residents and learning their personal stories.
- Helping people with requests and problems.
- Exploring different areas and uncovering mysteries.
- Developing your own home and community.

Main Story

Heartopia is a peaceful island where people live happy, simple lives. One day, you arrive as a new resident, ready to start a fresh life. You meet Mayor Atara, make new friends, build your home, and slowly discover that the island has many hidden stories.

Fishing Village: You visit a small village near the sea. The people are trying to restore their harbor and lighthouse. You meet the lighthouse keeper, Will, and help bring life back to the village.

Flower Field: You meet Vernie, who tells you about two teenagers. One loves music, while the other spends his time looking at the ocean. You find them and play music for them. Through Vernie, you also hear about a mysterious legend called Astralis.

Amazing Forest: You enter a beautiful but mysterious forest. You meet Patti and Cassie, explore the woods, and discover a strange little creature called Oak-Oak trapped among the roots. You free it and begin to wonder what other secrets the forest holds.

Onsen Mountain: You meet Eric, who manages an adventure park. He tells you another story about Astralis and asks you to find a rare mineral called Fluorite. His story gives you another clue about the island's mysterious past.

Purple Light Beach: You explore the beautiful coastline, where the ocean becomes an important part of your adventure.

Whalefall Canyon: One day, a group of marine explorers discovers a mysterious underwater world after an earthquake. You join their adventure, meet Rory, Oliver, and Azure, and help investigate strange discoveries, including the mysterious Rainbow Whale and Pink Whale. You also help clean and protect the underwater environment.

Bigger mystery

As you travel around Heartopia, you hear different stories about Astralis. Each person knows a little about it, but nobody explains the whole mystery.

You slowly discover that the island is full of unusual creatures, old legends, and hidden secrets.

In simple words: Heartopia is a story about starting a new life, making friends, exploring beautiful places, helping people, and discovering the secrets of a mysterious island.

IMPORTANCE: Heartopia is a very story focusing game

Main Story

1. The beginning – Meeting Alice

Alice is a cheerful and helpful girl who lives in Lummelunda.

She welcomes new people into her world and helps them become part of the community.

When you arrive, Alice greets you and introduces you to the island. She wants you to feel at home and become part of the neighborhood.

You soon meet other friendly characters who will help you begin your adventure.

2. Meeting the neighbors

Alice has several close friends:

- Björn the Bear: A friendly bear who helps you with fishing and other activities.
- José: A shipwright who helps you travel between islands.
- Bob: A beekeeper who introduces you to the world of bees and nature.
- Ivan: A merchant who sells useful items.

Together, they make the island feel like a small community where everyone has a role.

3. Your own island and new life

After meeting Alice, you receive the opportunity to establish your own home.

You get a piece of land where you can build a house, grow crops, raise animals and decorate your surroundings.

Alice and her friends guide you as you learn how to manage your property.

Slowly, your little piece of land becomes your own home.

4. Exploring the Archipelago

The world contains six main islands:

- The Town
- Snowflake Island
- Medieval Plains
- Nature's Rest
- Sandy Coast
- Submerged Islands

Each island has its own environment, atmosphere and activities.

You can explore, meet new neighbors, discover resources and help different characters.

IMPORTANCE: My Neighbor Alice is a blockchain game (Web3 Game). Unlike traditional games, it supports digital ownership of in-game assets.
